

Current Loop 1 Sensor (50A)

Monitor electrical current flowing through a single-phase powered cable.

RMA-CL1-SEN

We've got facilities covered.

Monitor the electrical current flowing through a single-phase powered cable up to 50A with the Current Loop 1 Sensor. Just connect this sensor to a Room Alert's analog sensor port after attaching to a power cable, and it will monitor power consumption to help you determine if a power drop may be causing problems, or if an appliance is drawing too much power.
